

ID2Q

Converting InDesign documents in QuarkXPress

ID2Q (InDesign to QuarkXPress) is a quick, easy and inexpensive solution for converting Adobe InDesign content (all versions) into a new QuarkXPress document (v9 - 2018 Mac).

All elements of the document, including object positions, colors, fonts, text attributes, images, etc. are converted with a single click.

ID2Q also converts between cross-platform files, converting Adobe InDesign content created in Windows to Macintosh QuarkXPress. ID2Q conversion technology saves countless hours of scanning, re-keying and re-formatting documents.

ID2Q is available as a perpetual license for:

- QuarkXPress 2018, 2017, 2016, 2015, v.10 and v.9 MAC

Notice:

File conversion is performed to the best standard achievable by current technology but will not be 100%. Use of this product is likely to require some manual processing to achieve the desired result.

The XTensions for QuarkXPress 2015, 10, and 9 were discontinued on May 16, 2018. These QXP 2015, 10, and 9 XTensions will NOT receive support for InDesign beyond CC 2018, but will continue to be downloadable in their current state.
